

FAST PRINTING, NO-MAINTENANCE, AFFORDABLE!

EGGJet

Printer for continuous marking and lettering of eggs

Machine description

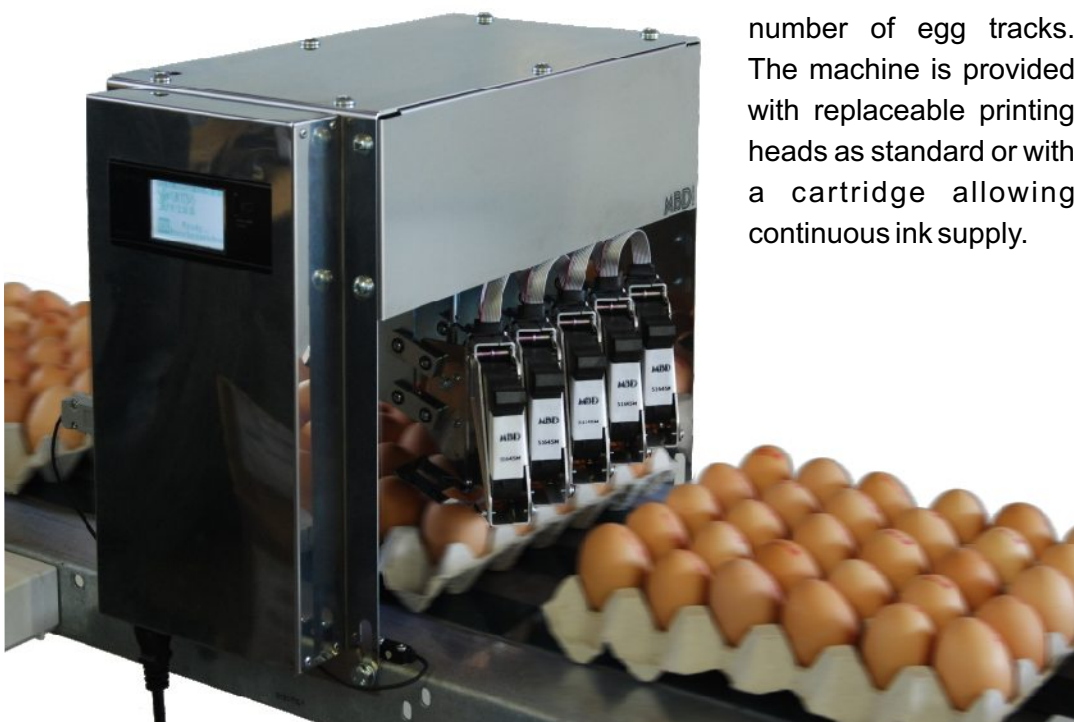

A contact free semi-automatic marker designed for continuous marking and lettering of eggs. The device serves for printing of texts, dates, pictures....

The moving ink spraying heads (1_6) shift forward by copying the eggs shape and provide for the quality printing. Flexibility this device offers makes it suitable for both, the small and medium size producers as well as big sorting plants provided with electronic sorting machines. The data to be printed are downloaded from the memory card supplied with the rest of equipment.

Machine accessories

The EGGJet machine accessories also include a belt conveyer advancing the egg trays right below the ink print-heads. The printing is controlled by means of a sensor which detects the coming trays with eggs. An adequate number of printing heads may be used for marking and lettering of eggs on sorting or packing machine,

in accordance with number of egg tracks. The machine is provided with replaceable printing heads as standard or with a cartridge allowing continuous ink supply.

EGG CODING SOLUTION

FAST PRINTING, NO-MAINTENANCE, AFFORDABLE!
